Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention generally relates to network management systems and more particularly to construction and simulation of behavior of complex networks of network elements of the network management systems.

The prior art of record in combination or alone fails to teach or suggest these elements of the independent claim 11 in combination with other elements. For example independent claim 11 has claim limitations such as receiving an interface description language (IDL) supplied by EMS client, generating an EMS skeleton using the IDL and TMS specific information of the IDL, wherein the EMS skeleton is a framework of behavior of all the EMS, extracting data from the EMS client when the EMS client is available, the data including interface specification of the client, converting the data into XML templates, generating a set of virtual network elements using XML templates, wherein the virtual network elements simulate behavior of network elements of the EMS client, and connecting the virtual network elements with each other, thereby creating the virtual network. For the above reasons, independent claim 11 and its dependent claims 12-16 are allowable.

2. Claims 11-16 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melur Ramakrishnaiah whose telephone number is (571)272-8098. The examiner can normally be reached on 9 Hr schedule.
